

I am writing to urge you not to allow LPFM stations to displace the local K-LOVE station that I listen to on 91.1, 88.3 and 88.5. I am greatly disturbed to learn that the one station that I listen to the most may be removed from the air. What will I do then? As a grandmother, K-LOVE is the only station that I can listen to without fear of what my family and grandchildren may hear. After last year's Super Bowl incident I would think that the FCC would care more about keeping positive and encouraging radio stations like K-LOVE on the air. There is too much negative influence in this world already, too much has been stripped from those of us that desire a moral and stable message coming into our homes, please do not take K-LOVE away as well. All of my friends listen to K-LOVE, I listen to it at work and I know that the impact on us if it was taken away would be devastating. I EXPECT the FCC to act properly in this situation, I agree that action should be taken but it should be to KEEP stations like K-LOVE on the air not remove them.
